

Flood hazard parameters

Sc1: "100yr_flood_historic_Khok.tif" : Flood extent for rainfall event with a 1-in-100 yr probability based on the historic rainfall data record.

Sc2: "100yr_flood_MF_med_Khok.tif": Flood extent for rainfall event with a 1-in-100 yr probability using the median values of climate change projections for mid-future scenarios. Approximately equivalent to 250yr to 500-yr flood based on static historical record.

Sc3: "100yr_flood_MF_max_Khok.tif": Flood extent for rainfall event with a 1-in-100 yr probability using the maximum values of rainfall generated from climate change projections for mid-future scenarios. Approximately equivalent to 1000-yr flood based on static historical record.
